

# Infor VISUAL API Toolkit Shared Library Reference

### **Important Notices**

The material contained in this publication (including any supplementary information) constitutes and contains confidential and proprietary information of Infor.

By gaining access to the attached, you acknowledge and agree that the material (including any modification, translation or adaptation of the material) and all copyright, trade secrets and all other right, title and interest therein, are the sole property of Infor and that you shall not gain right, title or interest in the material (including any modification, translation or adaptation of the material) by virtue of your review thereof other than the non-exclusive right to use the material solely in connection with and the furtherance of your license and use of software made available to your company from Infor pursuant to a separate agreement, the terms of which separate agreement shall govern your use of this material and all supplemental related materials ("Purpose").

In addition, by accessing the enclosed material, you acknowledge and agree that you are required to maintain such material in strict confidence and that your use of such material is limited to the Purpose described above. Although Infor has taken due care to ensure that the material included in this publication is accurate and complete, Infor cannot warrant that the information contained in this publication is complete, does not contain typographical or other errors, or will meet your specific requirements. As such, Infor does not assume and hereby disclaims all liability, consequential or otherwise, for any loss or damage to any person or entity which is caused by or relates to errors or omissions in this publication (including any supplementary information), whether such errors or omissions result from negligence, accident or any other cause.

Without limitation, U.S. export control laws and other applicable export and import laws govern your use of this material and you will neither export or re-export, directly or indirectly, this material nor any related materials or supplemental information in violation of such laws, or use such materials for any purpose prohibited by such laws.

## About this guide

This guide describes the objects available for use in the Infor VISUAL API Toolkit Shared library.

**NOTE:** This class library exposes classes and methods that are not compatible with the VISUAL API Toolkit. Only the classes and methods specifically described in this document are compatible. The use of any class or method that is not described in this document is not supported.

## Intended audience

The intended audience of this guide is developers who are using the API Toolkit to extend the VISUAL solution.

## Contacting Support

If you have questions about Infor products, go to the Infor Customer Portal at <https://customerportal.infor.com/csmcore/>

If we update this document after the product release, we will post the new version on this Web site. We recommend that you check this Web site periodically for updated documentation.

If you have comments about Infor documentation, contact <https://docs.infor.com/en-us>.

## Supported languages

These languages are supported for use with the toolkit:

- Visual Basic
- C#

While it is possible to use any .NET-aware programming language with the toolkit, other languages are not officially supported.

## Support information

The API Toolkit will be updated regularly as more class members are added to each assembly, schema changes are made, and any reported issues are resolved. Infor Support cannot assist you with developing customized code using the API Toolkit. For assistance with customizations, contact Infor Consulting Services or your channel partner.

The functionality provided within the API Toolkit will not be extended beyond the standard functionality experienced in the VISUAL application itself. Enhancement requests with compelling business cases detailing how suggested alternatives are not viable will be evaluated and considered.

Infor is not responsible for data incorrectly entered to the database through the use of the API Toolkit. Customers must establish a full test environment to ensure that data created by APIs functions in the same manner as data created through the VISUAL interface.

# Lsa.Shared Namespace

## Classes

	Class	Description
	<a href="#">GeneralQuery</a>	General Query. This service allows you to cause a query execution under data object control with transmission of the result set to the client side.

# GeneralQuery Class

General Query. This service allows you to cause a query execution under data object control with transmission of the result set to the client side.

## Inheritance Hierarchy

[System.Object](#)  
[System.MarshalByRefObject](#)  
[System.ComponentModel.Component](#)  
**BusinessObject**  
**BusinessService**  
Lsa.Shared.GeneralQuery

**Namespace:** [Lsa.Shared](#)

**Assembly:** LsaShared (in LsaShared.dll) Version: 8.1.0.0 (8.1.0.0)

## Syntax

### C#

```
[SerializableAttribute]  
public class GeneralQuery : BusinessService,  
    IGeneralQuery, IDisposable
```

### VB

```
<SerializableAttribute>  
Public Class GeneralQuery  
    Inherits BusinessService  
    Implements IGeneralQuery, IDisposable
```

The **GeneralQuery** type exposes the following members.

## Constructors

	Name	Description
	<a href="#">GeneralQuery()</a>	Constructor.
	<a href="#">GeneralQuery(String)</a>	Constructor.

## Methods

	Name	Description
	<a href="#">Execute()</a>	Execute the specified query. All rows are returned.
	<a href="#">Execute(String)</a>	Execute the specified query. All rows are returned.
	<a href="#">Execute(Int32, Int32)</a>	Execute the specified query, starting at a specified row number, limited by a record count.
	<a href="#">Execute(String, Int32, Int32)</a>	Execute the specified query, starting at a specified row number, limited by a record count.
	<a href="#">Prepare</a>	Prepare to execute the specified query.

## Properties

	Name	Description
	<a href="#">DataObjectType</a>	Report types of data object associated with this business object (Overrides <b>BusinessObject.DataObjectType</b> .)
	<a href="#">Parameters</a>	

## See Also

[Lsa.Shared Namespace](#)

# GeneralQuery Constructor

## Overload List

	Name	Description
	<a href="#">GeneralQuery()</a>	Constructor.
	<a href="#">GeneralQuery(String)</a>	Constructor.

## See Also

[GeneralQuery Class](#)

[Lsa.Shared Namespace](#)

# GeneralQuery Constructor

Constructor.

**Namespace:** [Lsa.Shared](#)

**Assembly:** LsaShared (in LsaShared.dll) Version: 8.1.0.0 (8.1.0.0)

## Syntax

### C#

```
public GeneralQuery()
```

### VB

```
Public Sub New
```

## See Also

[GeneralQuery Class](#)

[GeneralQuery Overload](#)

[Lsa.Shared Namespace](#)

# GeneralQuery Constructor (String)

Constructor.

**Namespace:** [Lsa.Shared](#)

**Assembly:** LsaShared (in LsaShared.dll) Version: 8.1.0.0 (8.1.0.0)

## Syntax

### C#

```
public GeneralQuery(  
    string databaseInstanceName  
)
```

### VB

```
Public Sub New (  
    databaseInstanceName As String  
)
```

## Parameters

*databaseInstanceName*

Type: [System.String](#)

## See Also

[GeneralQuery Class](#)

[GeneralQuery Overload](#)

[Lsa.Shared Namespace](#)

# GeneralQuery.GeneralQuery Methods

The [GeneralQuery](#) type exposes the following members.

## Methods

	Name	Description
	<a href="#">Execute()</a>	Execute the specified query. All rows are returned.
	<a href="#">Execute(String)</a>	Execute the specified query. All rows are returned.
	<a href="#">Execute(Int32, Int32)</a>	Execute the specified query, starting at a specified row number, limited by a record count.
	<a href="#">Execute(String, Int32, Int32)</a>	Execute the specified query, starting at a specified row number, limited by a record count.
	<a href="#">Prepare</a>	Prepare to execute the specified query.

## See Also

[GeneralQuery Class](#)

[Lsa.Shared Namespace](#)

# GeneralQuery.Execute Method

## Overload List

	Name	Description
	<a href="#">Execute()</a>	Execute the specified query. All rows are returned.
	<a href="#">Execute(String)</a>	Execute the specified query. All rows are returned.
	<a href="#">Execute(Int32, Int32)</a>	Execute the specified query, starting at a specified row number, limited by a record count.
	<a href="#">Execute(String, Int32, Int32)</a>	Execute the specified query, starting at a specified row number, limited by a record count.

## See Also

[GeneralQuery Class](#)

[Lsa.Shared Namespace](#)

# GeneralQuery.Execute Method

Execute the specified query. All rows are returned.

**Namespace:** [Lsa.Shared](#)

**Assembly:** LsaShared (in LsaShared.dll) Version: 8.1.0.0 (8.1.0.0)

## Syntax

### C#

```
public virtual void Execute()
```

### VB

```
Public Overridable Sub Execute
```

## Implements

IGeneralQuery.Execute()

## See Also

[GeneralQuery Class](#)

[Execute Overload](#)

[Lsa.Shared Namespace](#)

# GeneralQuery.Execute Method (String)

Execute the specified query. All rows are returned.

**Namespace:** [Lsa.Shared](#)

**Assembly:** LsaShared (in LsaShared.dll) Version: 8.1.0.0 (8.1.0.0)

## Syntax

### C#

```
public virtual void Execute(  
    string tableName  
)
```

### VB

```
Public Overridable Sub Execute (  
    tableName As String  
)
```

## Parameters

*tableName*

Type: [System.String](#)

Must match the table name from Prepare.

## Implements

**IGeneralQuery.Execute(String)**

## See Also

[GeneralQuery Class](#)

[Execute Overload](#)

[Lsa.Shared Namespace](#)

# GeneralQuery.Execute Method (Int32, Int32)

Execute the specified query, starting at a specified row number, limited by a record count.

**Namespace:** [Lsa.Shared](#)

**Assembly:** LsaShared (in LsaShared.dll) Version: 8.1.0.0 (8.1.0.0)

## Syntax

### C#

```
public virtual void Execute(  
    int startRecord,  
    int maxRecords  
)
```

### VB

```
Public Overridable Sub Execute (  
    startRecord As Integer,  
    maxRecords As Integer  
)
```

## Parameters

*startRecord*

Type: [System.Int32](#)

*maxRecords*

Type: [System.Int32](#)

## Implements

**IGeneralQuery.Execute(Int32, Int32)**

## See Also

[GeneralQuery Class](#)

[Execute Overload](#)

[Lsa.Shared Namespace](#)

# GeneralQuery.Execute Method (String, Int32, Int32)

Execute the specified query, starting at a specified row number, limited by a record count.

**Namespace:** [Lsa.Shared](#)

**Assembly:** LsaShared (in LsaShared.dll) Version: 8.1.0.0 (8.1.0.0)

## Syntax

### C#

```
public virtual void Execute(  
    string tableName,  
    int startRecord,  
    int maxRecords  
)
```

### VB

```
Public Overridable Sub Execute (  
    tableName As String,  
    startRecord As Integer,  
    maxRecords As Integer  
)
```

## Parameters

*tableName*

Type: [System.String](#)

Must match the table name from Prepare.

*startRecord*

Type: [System.Int32](#)

*maxRecords*

Type: [System.Int32](#)

## Implements

**IGeneralQuery.Execute(String, Int32, Int32)**

## See Also

[GeneralQuery Class](#)

[Execute Overload](#)

[Lsa.Shared Namespace](#)

# GeneralQuery.Prepare Method

Prepare to execute the specified query.

**Namespace:** [Lsa.Shared](#)

**Assembly:** LsaShared (in LsaShared.dll) Version: 8.1.0.0 (8.1.0.0)

## Syntax

### C#

```
public virtual void Prepare(  
    string tableName,  
    string sqlCommand  
)
```

### VB

```
Public Overridable Sub Prepare (  
    tableName As String,  
    sqlCommand As String  
)
```

## Parameters

*tableName*

Type: [System.String](#)

*sqlCommand*

Type: [System.String](#)

## Implements

**IGeneralQuery.Prepare(String, String)**

## See Also

[GeneralQuery Class](#)

[Lsa.Shared Namespace](#)

# GeneralQuery.GeneralQuery Properties

The [GeneralQuery](#) type exposes the following members.

## Properties

	Name	Description
	<a href="#">DataObjectType</a>	Report types of data object associated with this business object (Overrides <b>BusinessObject.DataObjectType</b> .)
	<a href="#">Parameters</a>	

## See Also

[GeneralQuery Class](#)

[Lsa.Shared Namespace](#)

# GeneralQuery.DataObjectType Property

Report types of data object associated with this business object

**Namespace:** [Lsa.Shared](#)

**Assembly:** LsaShared (in LsaShared.dll) Version: 8.1.0.0 (8.1.0.0)

## Syntax

### C#

```
public override Type DataObjectType { get; }
```

### VB

```
Public Overrides ReadOnly Property DataObjectType As Type  
    Get
```

## Property Value

Type: [Type](#)

## See Also

[GeneralQuery Class](#)

[Lsa.Shared Namespace](#)

# GeneralQuery.Parameters Property

**Namespace:** [Lsa.Shared](#)

**Assembly:** LsaShared (in LsaShared.dll) Version: 8.1.0.0 (8.1.0.0)

## Syntax

### C#

```
public ParameterCollection Parameters { get; }
```

### VB

```
Public ReadOnly Property Parameters As ParameterCollection  
    Get
```

## Property Value

Type: **ParameterCollection**

## Implements

**IGeneralQuery.Parameters**

## See Also

[GeneralQuery Class](#)

[Lsa.Shared Namespace](#)
